Professional Summary

Full-Stack Software Engineer with 3+ years of production experience building backend systems in Python (Django, Django REST Framework) and full-stack applications with NestJS, Next.js, and TypeScript. Experienced across the full engineering lifecycle: API design, database schema and query optimization, CI/CD pipelines, containerized deployments, and coordinating parallel client projects. Comfortable working directly with international clients in a remote, English-first environment.

Professional Experience

Software Engineer II

Jan 2025 – Present

Innovative Skills LTD, Dhaka, Bangladesh

- Built a large-scale e-commerce platform with an integrated POS system using Django and PostgreSQL, handling real-time inventory, order lifecycle, billing, and automated invoice generation.
- Developed full-stack solutions with NestJS and Next.js for a live-class platform supporting thousands of concurrent users, with real-time classroom interaction over WebSockets.
- Designed modular REST APIs and coordinated API contracts with frontend teams across 5 parallel client projects running simultaneously.
- Set up GitHub Actions CI/CD pipelines with Docker: automated tests on every push, containerized builds, and zero-downtime SSH deploys to a Linux VPS.
- Reduced API response times through database indexing, query optimization, and Redis caching.

Software Engineer

Oct 2023 – Dec 2024

Innovative Skills LTD, Dhaka, Bangladesh

- Migrated a legacy system to Node.js and TypeScript, reducing backend bugs and making frontend integration more predictable.
- Added end-to-end type safety across frontend and backend, catching entire classes of runtime errors at compile time.
- Collaborated with QA and UI teams to ship features against stable, consistent API contracts.

Web Developer

Jun 2023 – Sep 2023

OutNet, Remote

- Built MERN stack applications with React Native mobile clients, keeping data synchronized across web and mobile in real time.
- Improved Lighthouse performance scores by 30% through frontend asset optimization and a reusable component system.
- Managed application state with Redux Toolkit and built RESTful APIs for consistent cross-platform behavior.

Education

Bachelor of Technology in Computer Science and Engineering

2018 – 2022

National Institute of Technology (NIT), Rourkela, India

- ICCR Government Scholarship Recipient

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, PHP
- **Backend:** Django, Django REST Framework, NestJS, Node.js, Laravel, REST APIs, WebSockets, SOLID Principles
- **Frontend:** React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **DevOps:** Docker, Docker Compose, GitHub Actions, CI/CD, Linux, SSH
- **Other:** Git, Celery, WebRTC, Agile/Scrum
